

IFATSEA Verified Training Program

The International Federation of Air Traffic Safety Electronics Associations pleased to announce a new initiative as part of the International Federation of IFATSEA Strategic Committee – Training Subcommittee called the IFATSEA Verified Training Program. The initial focus of this program is on Basic Training for Air Traffic Safety Electronics Personnel (ATSEP).

The IFATSEA Verified Training Program for ATSEP is a program aimed at verifying the Basic Training courses for ATSEP, who play a critical role in ensuring the safe and efficient operation of air traffic control systems. The program aims to ensure that ATSEP have received the necessary Basic training objectives to perform their duties and gain awareness to carry out their tasks.

The Verified Training Program ensures the global harmonization of Basic Training in support of the successful achievement of the Basic Training Objectives as listed in the International Civil Aviation Organization (ICAO) Manual on Air Traffic Safety Electronics Personal Competency-based Training and Assessment Doc 10057.

A delegation of IFATSEA visited the training academy of Entry Point North in Malmö, Sweden in February 2023.

Entry Point North (EPN) has been the first training organisation to have its ICAO ATSEP Basic Training modules audited through the new **IFATSEA Verified Training Program**.

EPN offers an ATSEP Basic Training **instructor-led classroom training** as well as **Online e-learning modules**. Each course was reviewed under the IFATSEA Basic Verified Training Program. IFATSEA auditors are pleased to announced each course meets ICAO ATSEP Basic Training Objectives as listed in the ATSEP Competency-based Training and Assessment Doc 10057.

With this outstanding result, EPN sets a benchmark for quality and safety in the industry and demonstrates a commitment to excellence in ATSEP training. You can visit their website to learn more about here: <https://www.entrypointnorth.com>

Notes: One could highlight some benefits of the program:

Additional Benefits of Verified Training Program

- Ensure the underpinning knowledge for all ATSEP training.
- The program provides recognition to organizations and individuals who meet the Basic Objectives in aviation training. This recognition sets a benchmark for quality and safety in the industry and demonstrates a commitment to excellence.
- Increased credibility: The IFATSEA Verified training Program provides assurance to the aviation industry that the training received meets IFATSEA standards for Basic Objective training. This increased credibility can lead to increased opportunities and better job prospects.
- Increased knowledge and skills: This help to ensure that ATSEPs have the knowledge and skills necessary to succeed in industry.
- The program provides opportunities for aviation training organizations, instructors, and individuals to connect with other professionals in the industry. This can lead to collaborations, and valuable industry relationships.
- Build the foundation of understanding of the local and global impact of the work that ATSEPs perform.

IFATSEA - Training subcommittee / Strategic committee.
